First Birthday Cake Smash

A cake smash is a great way to celebrate a first birthday and is a way to capture beautiful of images of your child relaxed and having fun in our Ditchling studio.

We start off every cake smash in smart clothes you provide for your child so that they get used to where they are and the studio lights. We generally take photos for up to 30 minutes in this outfit and with their favourite toy or teddy bear.

Once they have relaxed into the session, we get them changed into a messy outfit or a nappy cover and we introduce them to the cake.

This stage goes one of two ways generally at the start, they either go for the cake straight away or wait on their parents' approval but they always end up the same way.

Once the cake has been well smashed, we help clean up and provide the final images for digital download once edited

Clients can either provide their own cake or we can have one professionally made with lots of icing to help make mess.
